Docket numbers NHTSA-2001-9628 and NHTSA-2001-9630

To Whom It May Concern, *NHTSA-01-9628-5*
NHTSA-01-9630-4

We strongly support the approval of petitions 484 and 485 for nonconforming 2001 Ferrari 360 and 550 Maranello passenger cars.

It has been our first hand experience that the U.S. and European models of Ferrari cars contain very few differences. There are certainly no structural or safety related changes which would prevent these cars from being safely operated on U.S. roads.

Any suggestion or comments that would suggest safety or structural differences between US versions and European versions should be considered erroneous.

I welcome correspondence and questions from NHTSA.

Sincerely,

David Castelhana
President
